

SELF IS SENTENCED ONE TO FIVE YEARS

Walter Self was found guilty of assault with intent to commit rape by a jury in the superior court of this county, last week, and Judge Bollinger passed sentence upon him last Monday. The sentence imposed was from one to five years in the penitentiary at Florence, and Sheriff Mahoney landed him in that institution last Wednesday. Self, it will be remembered, met a young lady on the highway below Kingman, about ten days ago, and made an assault upon her. She managed to escape from him and informed the officers, who arrested the fellow.

SELL INDIANS BOOZE FACE COURT CHARGE

Mike Pizan and Red Milich, probably Austrians, were arrested last week on a charge of selling liquor to Indians. When arrested they had in their room four suit cases inclosing four gallon bottles of booze. Just what the nature of the booze will be ascertained and it may prove to be a dangerous concoction. Milich gave cash bail in the sum of \$500 and is rustling bail for his partner. The two men brought the liquor from Los Angeles, claiming that it was sold to them for personal use and was twelve year old stock. They were selling it at \$8 per pint.

Pizan stated that he had been employed by Milich to help him take the suit cases into Arizona, receiving \$20 for his services and fare and expenses. He did not know what the contents of the grips was, although one of the bottles lost its cork and the contents flowed over and through the leather case. The men were held to the U. S. Grand jury in \$500 bail each.

Something to Worry About
We know a lot of men who could make more money for themselves if they didn't waste so much time worrying over Rockefeller's money.

POWER DEVELOPED ON THE COLORADO
(Continued From Front Page)

produce fully 5,000,000 horsepower of electricity. It would be possible to carry the dam to that height as the walls at the crest would be not more than 600 feet apart and would tie into the solid granite mountains that form the walls of the canyon. It would forever protect the farm lands of the Colorado river basin from overflow and provide ample water for the cultivation of more than 2,000,000 new acres and extend the growing season over the present cultivated area more than four months in each year. It would bring into cultivation fully 4,000,000 acres of land on the American side of the international line and supply water to every available acre of land below the line, in Mexico. It would make crop possibilities so extensive that the figures would be staggering to the ordinary mortal.

While we care little who brings in the big power projects in the Grand Canyon, we want "hands off" when it comes to the building of the project in Boulder Canyon. This project is one that only the federal government should control. It holds the solution of the problems of the farmers along the course of the Colorado river and its water and power should go hand in hand. The people need cheap power and with it many important manufacturing industries would be brought to life. The people need all the water that the river can furnish and there should be no diversion of the waters of this potential stream until the acres of the American homesteader and farmer have a needful supply. The United States is not going to hog the flow of the river, as the reclamation service assures us that every need that Lower California has can be met without impairing the rights of the lands of the United States, there being ample water for all.

Wrong impression prevails among the land owners of Los Angeles and the newspapers of the Angel City regarding the situation of dams in the canyons of the Colorado river. The Grand Canyon is about 300 miles in length and what is known as Marble Canyon is near the head of the great gorge. Diamond Canyon is 72 miles to the northeast of Kingman, while Boulder Canyon lies 82 miles to the northwest of Kingman. Just below Boulder Canyon the Colorado river turns sharply to the south and continues in that general direction to the Gulf of California. The Colorado river flows slightly northwest from the mouth of the Grand Canyon until it enters the smaller canyons below the mouth of the Virgin river. Boulder Canyon is 12 miles below the mouth of the Virgin, as the river runs, but only about eight miles in a direct line. Below Boulder Canyon is another Canyon known as Black Canyon. It was in this canyon that Goldfield and Tonopah,

STRAY ELKS OF OATMAN HAVE GOOD TIME

(Continued From Page One)
universal hour of recollection—Mr. Ray B. Robinson, exalted ruler of Kingman Lodge No. 468 arose and offered the "Elks" toast to departed brothers". The orchestra struck up "Auld Lang Syne" and all guests sang the first verse and chorus of this beautiful old Scotch song.

After luncheon there were informal numbers rendered by Miss "Pat" McCarthy and her sister, Mrs. Egli, of Kingman, who made a big hit with their clever songs. Also Dr. and Mrs. Tolleson, L. W. Smith, Chas. Pugh and V. P. Lucas took part.

Everyone returned to the dance hall where the grand march led by Mr. and Mrs. L. E. Ward started at 12 midnight and the dancing lasted until about 3:30 a. m.

The music was furnished by "I. S. McVea's Howdy Band" a colored orchestra from Los Angeles, especially imported for this occasion and their music was certainly all that could be desired for dancing. They were very liberal in playing encores also.

The Oatman Elks feel both pleased and honored by the large out of town representation, which made the strenuous night trip to be present. Special credit is due to Exalted Ruler Ray B. Robinson, Sec. W. P. Jones, and Trustees Ayers, Wilson and Beecher of the Kingman lodge for assistance in securing the music, furniture, furnishings, transportations and valued suggestions concerning the details of the affair.

Depends on Circumstances

"The sweetest order in the world to me used to be 'fall out,'" reminisced the ex-doughboy dreamily.

"I'd have hated to have got it on some occasions," replied his neighbor with the service button.

"You would, would you? You must have been a trick soldier. What was your outfit, buddy?"
"Aviation."

Gentle Reminder

"The storm burst upon us so suddenly we had no warning of its approach," related the tornado victim. "In an instant the house was demolished and scattered to the four winds. How I escaped being torn to pieces I do not know."

"Good Lord!" ejaculated little Mr. Meek. "That reminds me I almost forgot to do an errand for my wife."

To Our Customers and Friends:

We desire to express our deep appreciation of your valued and friendly cooperation which has assisted us in our success in the past, and extend to you our cordial greetings for the Christmas Season.

We sincerely hope that the New Year will give you its full measure of Prosperity.
